

Lake Geneva Chiropractic

Our office response to the Coronavirus (COVID-19)

As Chiropractors we are essential to the optimal function of Wisconsin's health care delivery system especially during a public health crisis.

We, the Doctors and staff at Lake Geneva Chiropractic want to assure you that we are taking positive steps in our office to limit risks to your health. While we have always been very proactive with cleaning and sanitation we want you to know that we have enhanced those efforts with a protocol that includes cleaning and sanitizing at the beginning, between patients, and the end of each day.

We would ask that if you have a significant cough, cold and or fever, or have been exposed to someone potentially infected with the Coronavirus, please inform us and refrain from visiting us at Lake Geneva Chiropractic until you have had an opportunity to quarantine.

As always, we want you to be proactive with your health! Eat healthy, fruits and vegetables, add Omega 3's, probiotics and extra Vitamin C. Drink lots of water! Get adjusted, improve the electrical impulses to your organ systems to maximize function!

Yours in health,

The Doctors and Staff
